RECONVIEW

SecureLot X1

MOBILE SECURITY CAMERA TRAILERS

The **SecureLot X1** is a fully mobile, solar-powered surveillance unit designed to be rapidly deployed in any environment.

- **Flexibility.** Features a 20-foot retractable mast that can house a variety of technology and equipment including cameras, lights, sensors, and audio speakers.
- **Rugged Design.** The self-contained hardware enclosures are designed to operate through extreme weather, dust, and impact.
- **Intelligent Tools.** Advanced AI-powered live video monitoring, alerts, and two-way audio communication to deter, detect, and respond in real time.
- **Continuous Uptime.** An optional backup fuel cell provides continuous uptime in extreme climates.

Ideal For:

- Construction Sites
- School Campuses
- Retail
- Event Management
- Critical Infrastructure
